

Quarterly Report 31 March 2024

## Commentary and analysis

### Market overview

The US Federal Reserve's interest rate communication was again the centre of attention for bond investors during the quarter. Following a good string of growth and employment data, and concomitantly higher than expected inflation data, the market started to wonder whether it was overenthusiastic in its forecast for rate cuts in 2024. Having priced in 6 cuts in 0.25% increments at the start of the year, the market quickly repriced to only 1, or maybe two cuts in 2024. The US 10-year bond yield rose from 3.86% to 4.25% by quarter end.

Local bonds followed the weaker global trend, with the yield on the 10-year government bond rising from 11.2% to 12.0% and the All Bond index falling 1.8% for the quarter. The market also had local factors to consider, like stubbornly high inflation registering 5.6% in February, a so-so budget saved by using profits in the Foreign Exchange Contingency Reserve Account (GFECRA) to reduce government debt, and most likely, the political uncertainty associated with the outcome (and consequences) of the National Election in May 2024. A recent poll suggested the ANC could garner just 37% of the vote with the MK Party expected to capture many of the ANC's lost votes and inviting the prospect that former lawbreakers may become future lawmakers.

The long end of the bond curve was the key detractor from returns with the 12-year plus index falling 2.7% and the 7-12 year index falling 2.4%. The 3-7 year index also delivered a negative return of -1.4%. While the shorter dated 1-3 year index (+0.8%) did provide a hiding place for bond managers during the quarter this return underperformed the money market (+2.1%) and was generated exclusively in January. The long dated R2044 (-2.9%) was the worst performing bond in the ALBI index, while the shorter dated R186 (+0.8%) maturing in December 2025 was the best performing bond. Inflation linked bonds outperformed nominal bonds but still produced a -0.4% return for the quarter.

### Asset class performance (%)

Local	Q1 2024	1 year	3 years	5 years	International	Q1 2024	1 year	3 years	5 years
FTSE/JSE All Share Index	-2.25	1.55	8.10	9.67	MSCI ACWI IMI (ZAR)	11.76	30.84	15.49	16.75

### Portfolio review

It was a challenging quarter with SA bonds performing negatively but the fund managed to deliver a positive return. The overweight duration position, which worked well in the last quarter, worked against the portfolio in this quarter. Longer term the fund is faring well against the peer group average. Both Prescient and Aluwani outperformed the average of the peers, with ALUWANI delivering stronger returns out of the two.

Aluwani was defensively positioned with a low duration of circa 1 year and positioned in medium dated bonds. Their short-dated ILB exposure, stable credit exposure as well as tactical unhedged foreign exposure added to their relative performance. Their zero holding in listed property was a lost opportunity.

Ninety One started the year out with a constructive outlook on local fixed income assets. As such, they held longer dated bonds to benefit from higher yields and an improving fiscal outlook, which detracted from returns in a quarter where bonds were down. Their small FX position as well as listed property holdings reduced the impact of the bond performance.

Prescient managed to deliver positive returns in the months when SA Bonds was down as a result of their high yielding exposures which counterbalanced the impact of their duration position.

### Portfolio positioning and outlook

Aluwani continues to be cautious as they believe it is premature for a major rally in fixed income assets. They expect better entry points to add to risk in the second half of this year. Overall, the fund maintains its attractive gross of fee yield of above 10.5% with a duration of approximately 1.5 years.

It has become evident that market participants overestimated the speed and magnitude at which interest rate cuts will occur locally and around the globe. Local bonds seem cheap optically, but poor sentiment and deteriorating local infrastructure remain the biggest hurdle for local assets to overcome (especially assets linked closely to local economic activity). We do think expected interest rate cuts later this year will be a catalyst to unlock local value, while a market-friendly local election outcome will likely lure investors currently sitting on the sideline back into the local financial markets. There are various permutations on election outcomes, but the likelihood is for the ANC's support to drop well below 50%, requiring coalition(s) with other parties.

Our highly skilled managers hold diversified portfolios and continue to assess the various geopolitical risks as well as the performance of the US and SA economies, to best determine positioning in the portfolio. With an attractive yield to maturity on the fund, it is well positioned going into the second quarter of the year.

### Change in allocation of the fund over the quarter

Asset type	Q1 2024	Q4 2023	Change
Domestic Cash & Mny Mkt	9.81	9.51	0.30
Domestic Equity	4.97	4.84	0.13
Domestic Fixed Interest	75.22	75.73	-0.51
Domestic Property	1.35	1.51	-0.16
Foreign Cash & Mny Mkt	5.05	4.29	0.76
Foreign Equity	1.75	1.48	0.27
Foreign Fixed Interest	1.82	2.61	-0.79
Foreign Property	0.02	0.02	0.00

*The portfolio adhered to its portfolio objective over the quarter.*

### Fund classes

Class	Type	TER	Price (cpu)	Units	NAV (Rand)
B1	Retail	0.94	109.14	359,140,150.90	391,982,942.60

*All Price, Units and NAV data as at 31 March 2024.*

*Units - amount of participatory interests (units) in issue in relevant class.*

*TER - 1 Year Total Expense Ratio (%) including VAT as at 31/12/2023.*

## Disclosures

### Information to be considered before investing

Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending.

The STANLIB Multi-Manager Absolute Income Fund is a portfolio of the STANLIB Collective Investment Scheme (the Scheme). The manager of the Scheme is STANLIB Collective Investments (RF) (Pty) Limited (the Manager). The Manager is authorised in terms of the Collective Investment Schemes Control Act, No. 45 of 2002 (CISCA) to administer Collective Investment Schemes (CIS) in Securities. Liberty is a full member of the Association for Savings and Investments of South Africa (ASISA). The Manager is a member of the Liberty Group of Companies. The manager has a right to close a portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. The Manager does not provide any guarantee either with respect to the capital or the return of a CIS portfolio. A schedule of fees and charges and maximum commissions is available on request from the Manager. The trustee of the Scheme is Standard Chartered Bank.

This portfolio is permitted to invest in foreign securities. Should the portfolio include any foreign securities these could expose the portfolio to any of the following risks: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

This is a portfolio that derives its income primarily from interest-bearing instruments. The yield (if shown) is a current effective yield calculated daily.

### Unit price – how it works

Prices are calculated and published on each working day, these prices are available on the Manager's website ([www.stanlib.com](http://www.stanlib.com)) and in South African printed news media. This portfolio is valued at 15h00. Forward pricing is used. Investments and repurchases will receive the price of the same day if received prior to 15h00.

The payment of withdrawals may be delayed in extraordinary circumstances, when the Manager with the consent of the Fund trustees deems this to be in the interest of all Fund investors. These circumstances may include periods when significant underlying markets suspend trading which will prevent accurate valuation of the instruments held in the Fund. When the suspension of trading relates to only certain assets held by the Fund, these assets may be side-pocketed. This process allows normal liquidity on the assets that can be valued but, will delay liquidity on the affected portion of the Fund. If the Fund is faced with excessive withdrawals, the affected withdrawals may be ring-fenced, which is the separation and delayed sale of the assets reflecting the interest of the liquidity seeking investors. It ensures that the sale of a large number of units will not force the Manager to sell the underlying investments in a manner that may have a negative impact on remaining investors of the Fund.

### Performance information

All performance returns and ranking figures quoted are shown in ZAR and are based on data sourced from Morningstar or Statpro and are as at 31 March 2024. Annualised return figures are the compound annualised growth rate (CAGR) calculated from the cumulative return for the period being measured. These annualised returns provide an indication of the annual return achieved over the period had an investment been held for the entire period. Actual annual figures are available on request from the Manager. Portfolio performance figures are calculated for the relevant class of the portfolio, for a lump sum investment, on a NAV-NAV basis, with income reinvested on the ex-dividend date. Individual investor performance may differ due to initial fees, actual investment date, date of reinvestment of income and dividend withholding tax. Portfolio performance accounts for all costs that contribute to the calculation of the cost ratios quoted, all returns quoted are after these costs have been accounted for.

### Total Expense Ratio (TER) and Transaction Costs (TC) = Total Investment Charge (TIC) and other fees

The TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio. The TER is a measure of the actual expenses incurred by the fund over a one and three-year period (annualised). This includes the TER charged by any underlying fund(s) held as part of this Fund. A high TER does not necessarily imply a poor return nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TER's.

Transaction costs are disclosed separately. Transaction costs are a necessary cost in managing a fund and impacts the fund's return. They should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

The sum of the TER and Transaction Costs is shown as the Total Investment Charge (TIC).

Annual management fee: The Fund charges a fixed annual management fee (i.e. fee class) as a percentage of the assets under management, to ensure a simple and understandable fee structure. The Fund invests primarily in segregated mandates but may also invest in other unit trusts i.e. "Underlying Fund Fees", which are included in the Total Expense Ratio (TER). The annual management fee is accrued daily and paid on a monthly basis.

Advice fees: If an investor appoints an adviser, advice fees are contracted directly between the investor and the adviser. The Manager will facilitate the collection of advice fees only upon receiving an investors instruction to do so. Initial advice fees up to a maximum of 3.45% are collected prior to units being purchased and ongoing advice fees up to a maximum of 1.15% are collected monthly through the redemption of units held by an investor in the Fund. An investor may cancel the instruction to facilitate the payment of advice fees at any time.

### STANLIB Multi-Manager does not provide financial advice

The investments of this portfolio are managed, on behalf of the Manager, by STANLIB Multi-Manager a division of STANLIB Asset Management (Pty) Ltd, an authorised financial services provider (FSP), FSP No. 719, under the Financial Advisory and Intermediary Services Act (FAIS), Act No. 37 of 2002.

This document is not advice, as defined under FAIS. Please be advised that there may be representatives acting under supervision.
